

STATE OF THE METRICS

GLEN ELLYN SCHOOL DISTRICT 41

October 5, 2020

Presented by the Glen Ellyn School District 41

Pandemic Response Advisory Team Metrics Subcommittee:

Katie Adduci, APRN, MSN, FNP-BC is a Board Certified Emergency Nurse at Advocate Good Samaritan Hospital in Downers Grove where she has practiced for the past 15 years. She is on the Board of Directors for the Illinois Society of Advanced Practice Nurses. She is a parent member of Ann & Robert H. Lurie Children's Hospital of Chicago Family and Ethics Advisory Boards. She volunteers for the National Kidney Foundation of Illinois pediatric programs. She is also a Medical Guardian for Honor Flight Chicago. She lives in Glen Ellyn with her husband and two children, who attend Ben Franklin Elementary and Hadley Junior High.

David Check is a banking professional with Masters of a Business Administration degree and Chartered Financial Analyst certification. In his career, David has financed acquisitions of numerous private educational and healthcare companies, reviewing budgets and financial ledgers. David is a member of the FAC committee to the SD 41 Superintendent. He lives in Glen Ellyn with his wife and two kids, who attend Churchill Elementary in its dual language program.

Ellen Dickey has worked at Argonne National Laboratory in the BioSafety and Security program for the past seven years. Prior to that she worked for the federal government for 10 years in the national security arena. She lives in Glen Ellyn and has a second and first grader at Ben Franklin, along with a three-year-old future Ben Franklin Bear.

Kathy Maxon is an employee of District 41 with a background in special education and is the Administrative Assistant at Churchill School. She is the President of AFSCME Local 1334, the union representing the support staff of the district. She has served on various district leadership teams, professional development teams, Churchill leadership team, and community task forces. Has presented at Illinois Professional Development Conferences and Learning Forward National Conferences for Educational Professional Learning. She has been a past small business owner/contractor in the construction sector. She lives in Glen Ellyn and her children are graduates of District 41 and District 87.

Metrics References

IDPH Metrics Methodology

All metrics will be updated weekly, based on the previous week (i.e., previous Sunday through Saturday)

Weekly New Case Rate per 100,000 people

Calculated as a rate = [County case count for 7 days] / [County population] x100,000

If there are fewer than 10 new cases for 7 days, the rate is not calculated and the exact count is used, due to instability in the rate.

Minimal: Case count is fewer than 10 or the rate is < 50 cases per 100,000 people

Moderate: Case rate is > 50 cases per 100,000 people or < 100 cases per 100,000

Substantial: Case rate is greater than 100 cases per 100,000 people

Weekly Count of New cases increase

The total count of new cases reported during the 7 days is measured for the change from week to week for two consecutive weeks

Minimal: Case number increases for 2 weeks, by > 5% each week and <10%

Moderate: Case number increases for 2 weeks, by > 10% each week and <20%

Substantial: Case number increases for 2 weeks, by > 20% each week

Weekly Count of New Youth Cases increase

The total count of new cases that are Under 20 years old, reported during the 7 days is measured for the change from week to week for two consecutive weeks

Minimal: Case number increases for 2 weeks, by > 5% each week and <10%

Moderate: Case number increases for 2 weeks, by > 10% each week and <20%

Substantial: Case number increases for 2 weeks, by > 20% each week

Test Positivity

The testing data represents data reported to IDPH through Electronic Laboratory Reporting (ELR) only. It is based on the date results are reported into the ELR. It excludes testing data that are received from sites that have not implemented ELR. This excludes 3-5% of test data. Weekly test positivity = [County positive tests for 7 days] / [County total tests for same 7 days] x 100

Minimal: Test positivity is <5%

Moderate: Test positivity is >5% and <8%

Substantial: Test positivity is >8%

DuPage County COVID-19 School Metrics Guidance

Minimal Community Transmission	Moderate Community Transmission	Substantial Community Transmission
<p>Encourage in-person learning with at least six feet of physical distancing between students and faculty/staff*</p> <p>Consider opt-in remote option for students</p> <p><u>* All IDPH/ISBE health & safety precautions in place, including universal use of face coverings</u></p>	<p>Encourage learning models that maintain at least six feet of physical distancing*</p> <p>Some-to-no mixing of groups of students and teachers throughout/across school days</p> <p>Some students participate in virtual and some participate in-person</p> <p>School officials should use their discretion and expertise to determine which populations of students should receive in-person instruction whose needs are less likely to be met by virtual instruction; maintain essential services in-person and/or with remote access.</p> <p><u>* All IDPH/ISBE health & safety precautions in place, including universal use of face coverings</u></p>	<p>Encourage 100% remote learning*</p> <p>School officials should use their discretion and expertise to determine which populations of students should receive inperson instruction whose needs are less likely to be met by virtual instruction.</p> <p><u>* All IDPH/ISBE health and safety precautions in place, including universal use of face coverings and at least six feet of physical distancing</u></p>
<p>Alert for one metric but remained BLUE (IDPH-defined) at any point in the last 4 weeks</p> <p>Weekly county case rates ≤ 50 per 100,000</p> <p>Weekly county overall case numbers increase for two consecutive weeks with a $>5\%$ to $\leq 10\%$ increase occurring each week</p> <p>Weekly county youth case numbers increase for two consecutive weeks with a $>5\%$ to $\leq 10\%$ increase occurring each week</p> <p>Weekly test positivity $\leq 5\%$</p> <p>Neighboring county in orange once in the last 4 weeks</p>	<p>Transitioned to ORANGE (IDPH-defined) once in last 4 weeks</p> <p>Weekly county case rates >50 to ≤ 100 per 100,000</p> <p>Weekly county overall case numbers increase for two consecutive weeks with a $>10\%$ or $\leq 20\%$ increase occurring each week</p> <p>Weekly county youth case numbers increase for two consecutive weeks with a $>10\%$ or $\leq 20\%$ increase occurring each week</p> <p>Weekly test positivity $>5\%$ but $\leq 8\%$</p>	<p>Remained in ORANGE (IDPH defined) for >2 consecutive weeks</p> <p>Weekly county case rates above > 100 per 100,000</p> <p>Weekly county overall case numbers increase for two consecutive weeks with a $> 20\%$ increase occurring each week</p> <p>Weekly county youth case numbers increase for two consecutive weeks with a $>20\%$ increase occurring each week</p> <p>Weekly test positivity $>8\%$</p> <p>Region moved to Tier 1 mitigation</p>
<p>Return to full in-person learning as before COVID-19 will be based on broad access and uptake of a safe, effective vaccine to prevent additional spread of COVID-19 and/or when there are no new cases over a sustained period. This corresponds to Phase 5 of Restore Illinois Plan.</p>
